

POLYURETHANE FOAM CHEMICAL RECYCLING

Pioneering the Future of
Sustainable Materials

Who We Are

Thaal Innovations Pvt Ltd is a mission-driven organization headquartered in Chennai dedicated to redefining resources in the world of plastics.

We specialize in the chemical recycling of polyurethane (PU) foam, transforming high-volume waste into valuable raw materials.

Performance & Integration:

10-20% Mix Use

Our recycled polyol is commercially validated for high-performance applications:

- **Proven Quality:** Molded foam using a 10% recycled polyol mix achieves best quality especially, density and hardness results nearly identical to 100% virgin material.
- **Consistency:** Foam rise comparison curves demonstrate that our recycled content maintains the same reaction profile as virgin chemicals.

What We Do: The 3R Circular Cycle

Reclaim

Recycle

Restock

Why Thaal? USP

**70%
LESS
CARBON
EMISSION**

Low carbon raw
material
